

AmeSal Liquiphos 40

CE FERTILIZER

Liquid Fertilizer

*Composition

Total Phosphorus pentaoxide (P ₂ O ₅)	40%	Appearance	Green, opalescent liquid
Total sulfur trioxide (SO ₃)	1,34%	Density at 20 °C	Circa 1,41 kg/l
Total magnesium oxide (MgO)	0,74%	Freezing point	-15°C
Iron (Fe ₂ O ₃)	0,71%	pH (20 °C)	1,8 unit. pH
AmeSal phosphorus enhance	0,2%		

*Characteristics

Analysis method: According to Regulation 2003/2003

AmeSal Liquiphos 40 is a phosphorus-based liquid fertilizer.

AmeSal Liquiphos 40 is recommended to use in corn, soybean, sugar beet and other crops.

Application dosage and methods: Apply a dose of 200 kg / ha, in a single application, by incorporating the product into the soil.

Application period: apply by spraying in small doses before sowing, when preparing the germinal bed, during or after sowing.

Storage conditions: Store the product in its original packaging, on a dry and smooth timber stand or shelf, at a temperature ranging between 5 and 30°C, away from sunrays.

* **Warning:** The use of the fertilizer for purposes other than the recommended ones and its discharge into surface or groundwater are forbidden.

Manufacturer: S.C COMBINATUL DE ÎNGRĂȘĂMINTE CHIMICE S.R.L
