

Data sheet

EC FERTILIZER

GAMA NUTRIFOLIUM

P-MAX

Liquid fertilizer

Composition	%, w/w	%, w/v	Characteristics	
Total nitrogen (N)	7	8.7	Appearance	Colloidal solution, brown
Ammoniacal nitrogen (N-NH ₄)	7	8.7	Density at 20 °C	1.25-1.27 kg / l
Phosphorus pentoxide (P ₂ O ₅) total	23	29	pH (20 °C)	6-6.5
			Electrical conductivity	76 - 93mS/cm

Analysis methods: according to Regulation 2003/2003.

Doses and application methods:

Recommended in foliar applications in doses of 2 – 3 l /ha.

***Warnings and compatibilities:**

Stir before use

For any mixture, a small-scale compatibility test is recommended before applying the treatment.

Packaging: 20 l canister

Storage conditions: The product is stored in its original packaging, waterproof, in cool, dry and well-ventilated rooms, away from the sun and heat sources. Storage temperature: between +5°C and 30°C.

Manufacturer: COMBINATUL DE ÎNGRĂȘĂMINTE CHIMICE S.R.L
